

The 5G Infrastructure Public-Private Partnership

Panel on business models and
regulatory aspects

Business models

- How will sectorial business models change in 2020 ?
- How will telecom operators business models evolve ?
- Will there be a need for compute / storage / big data services beyond connectivity ?

Regulation and policy aspects

- Which actions could be initiated at the government level to accelerate the adoption of 5G in the sector?
- What is the sector position with regards to specialized services versus best effort Internet?
- How important is data related regulation (Open Data, portability, privacy...)?
- Are there specific recommendations related to security?
- Are there specificities in the sector related to spectrum?

Panelists

- Frédéric Pujol, METIS II representative
- Christoph Thuemmler, eHealth representative
- Wouter Haerick, Factory of the Future representative
- Linus Thrybom, Energy representative
