Bologna, Italy

Sławomir Pietrzyk, CEO

- IS-Wireless is a Polish software developer and IP provider specializing in advanced solutions for wireless systems.
- IS-Wireless develops 4G and 5G algorithms, protocols and tools that are targeted primarily at early technology adopters including ODMs, OEMs, chip vendors and operators.

COMPANY FACTS

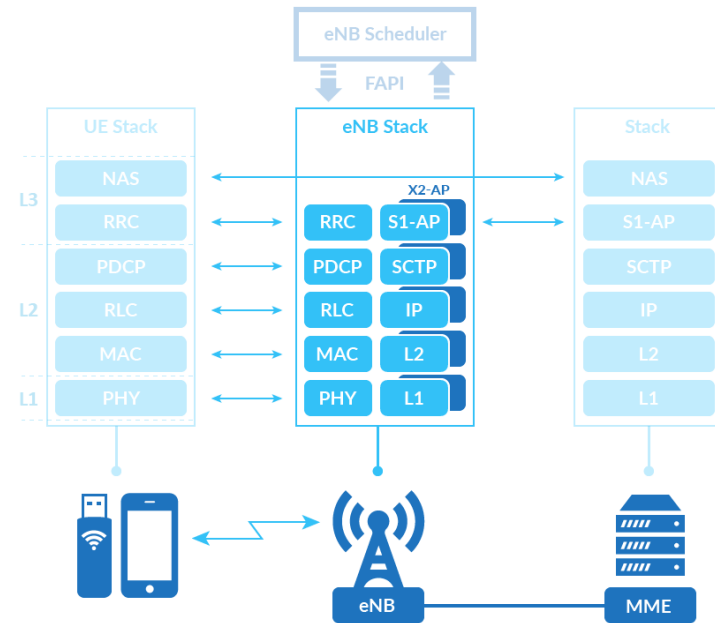

Founder and CEO	Slawomir Pietrzyk Privately held
Ownership	Piaseczno near Warsaw, Poland, EU
Location	15 people - SME
Size	Wireless communications
Industry	Software: protocols and simulators, IP: algorithms and know-how
Products	Technical courses, wireless systems design
Services	www.is-wireless.com
Web	

Products: protocols and tools

PROTOCOLS

TOOLS

What final product we contribute to

Tablets, smartphones

Dongles, tags

Small cell base stations

Large cell base stations

Wireless measurement tools

Radio network planning tools

Some of our happy clients

IS-Wireless provides protocols, training and tools primarily targeted at early technology adopters including ODMs, OEMs, chip vendors, integrators and operators. They may belong to any of the following vertical markets: telecoms, public safety, aerospace, automotive and education.

5G NOW

5th Generation Non-Orthogonal Waveforms for Asynchronous

- Budget of 3 526 991 EUR
- Partners: IS-Wireless, HHI, Fraunhofer, Alcatel-Lucent, CEA-Leti, NI, TUDresden

- Budget of 2 628 797 EUR
- Partners: IS-Wireless, Thales, Sigfox Wireless, iMINDS, TUBerlin, TUDresden, Institute Jozef Stefan

SOLDER

Spectrum Overlay through Aggregation of heterogeneous DisPERsed Bands

Budget of 3 275 296 EUR
Partners: IS-Wireless, Thales, Sequans, ISI, Kings College London, Eurocom

Expertise

- Radio resource management for LTE, LTE-A and 5G
- UE and eNB L1-L3 protocols
- Link-level and system-level simulations
- Embedded implementation (FPGA, DSP, GPP)
- Great dissemination capabilities

Research focus

- Small cell eNB
 - Radio resource management
 - C-RAN
 - Lean protocol stack design
 - New frame structures
 - Massive MIMO
- M2M UE
 - M2M modem design
 - New waveforms for M2M
 - Low power implementation

HetNets and small cells

Interference coordination

M2M
