

Limitless Video Delivery

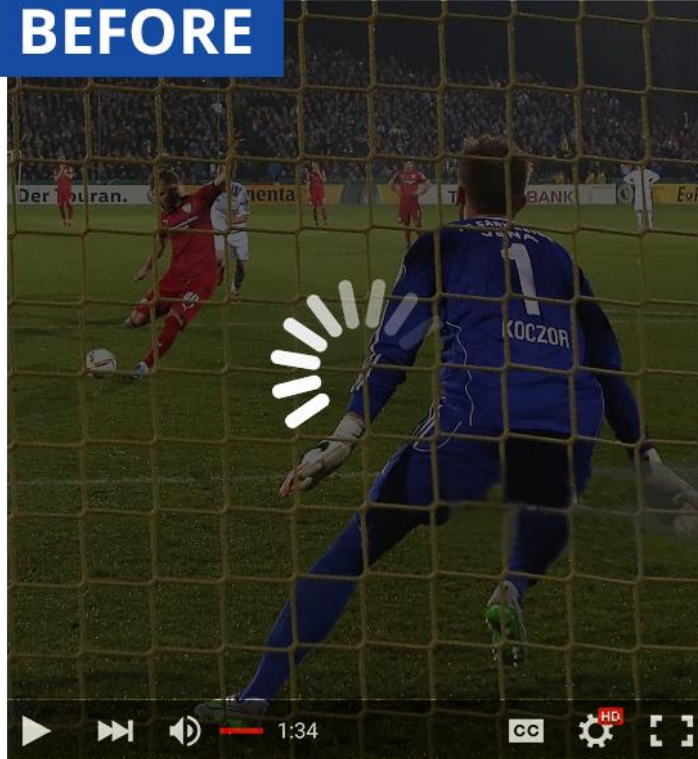

NPeer@ Athens June 30

NPeer

Problem

BEFORE

AFTER

Solution

#1 Add NPeer Mobile/Web Library to Your Application

#2 NPeer - Video Streaming CDN Starts to Work

#3 Users Load Video from Each Other

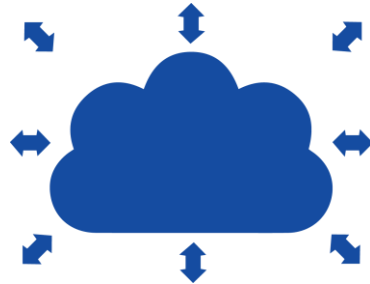

#1 Users receive better service #2 Content providers lower bandwidth

Npeer CDN Benefits

Server Offloading

Publishers can reduce **bandwidth costs** up to %96 with P2P delivery

Scalable CDN

CDN expands **server capacity** by more than 15x during live streaming events

Faster Streaming

User loads **video stream faster** and rebuffer less

Our Proposal

- NPeer offers an efficient scalable video streaming
- Live events testbed(stadium, concerts etc.)

Looking for

- 5G-PPP Phase 2 project partners on **Mobile Edge Computing**

Thanks...
