

2nd Global 5G Event in Rome, Italy

**ETRI**

# Paving the way for 5G

Nov. 10<sup>th</sup>, 2016

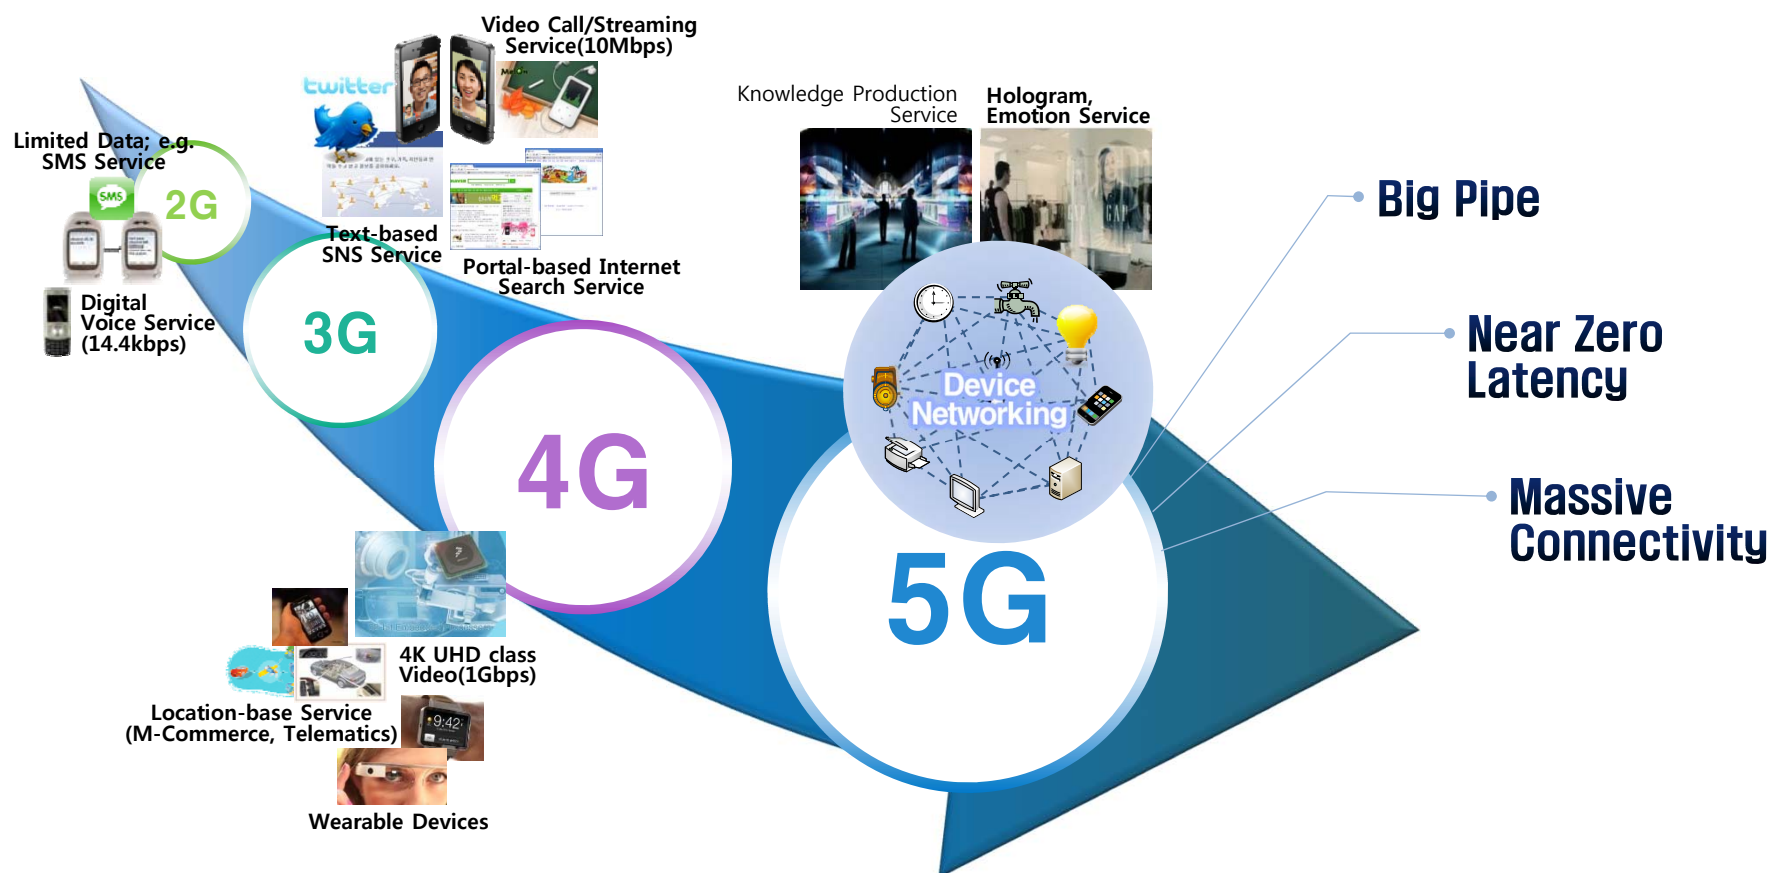

Dr. LEE, JunHwan

Wireless Transmission Research Section

**ETRI**

# Evolution of Mobile Services

# 5G Services & Use Cases

## Enhanced Mobile Broadband

High data rate

SMV/UHD

Hologram

VR/AR/Tele-Experience Services

Demanding conditions

Broadband Access  
in Dense Areas

Massive hot spots  
/Smart office

High-speed Mobility

Moving hot spots/  
High-speed train

## Ultra reliable and low latency communication

Ultra-high reliability/low latency

Tactile Internet

Remote-control robot/machines

Connected cars (V2X)

## Massive machine type communication

Massive connectivity

Remote sensors/actuators

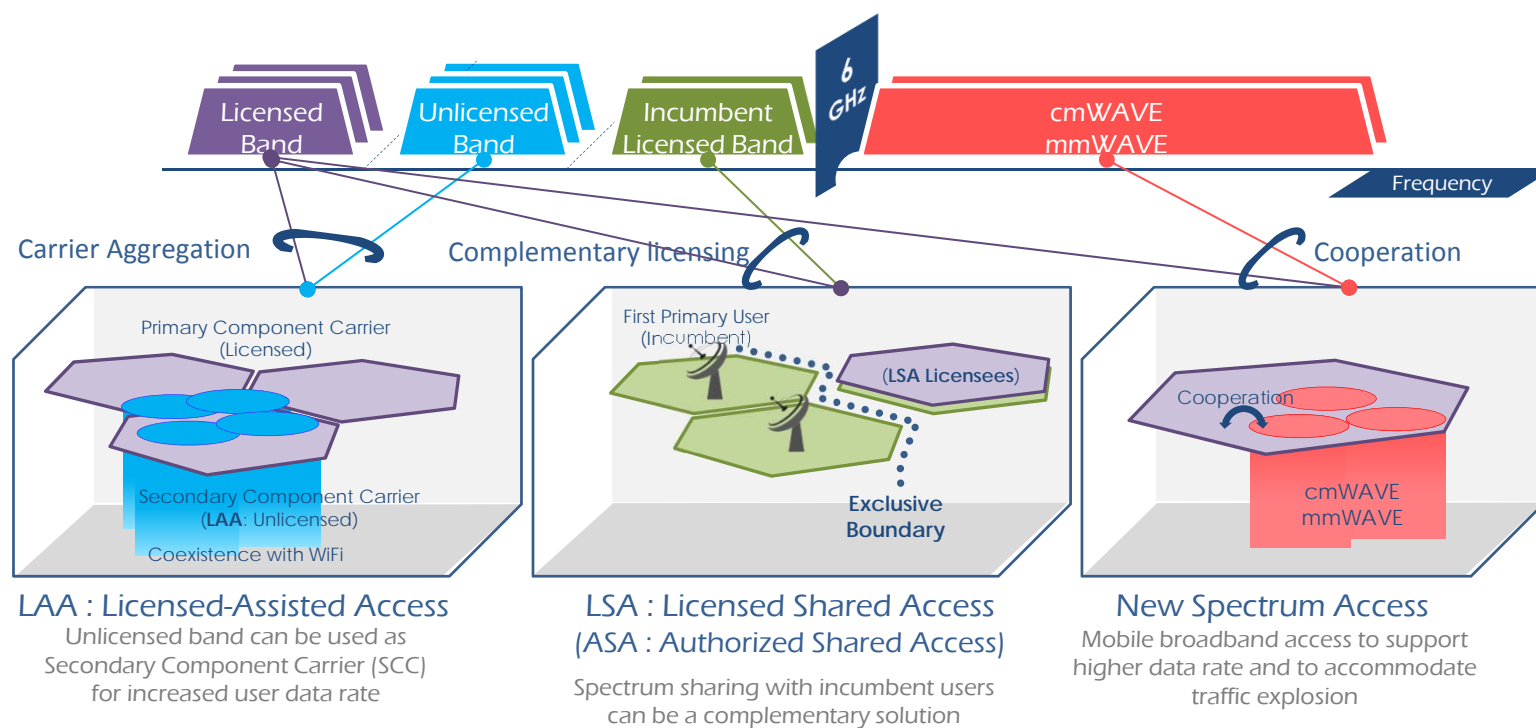

Smart city-home

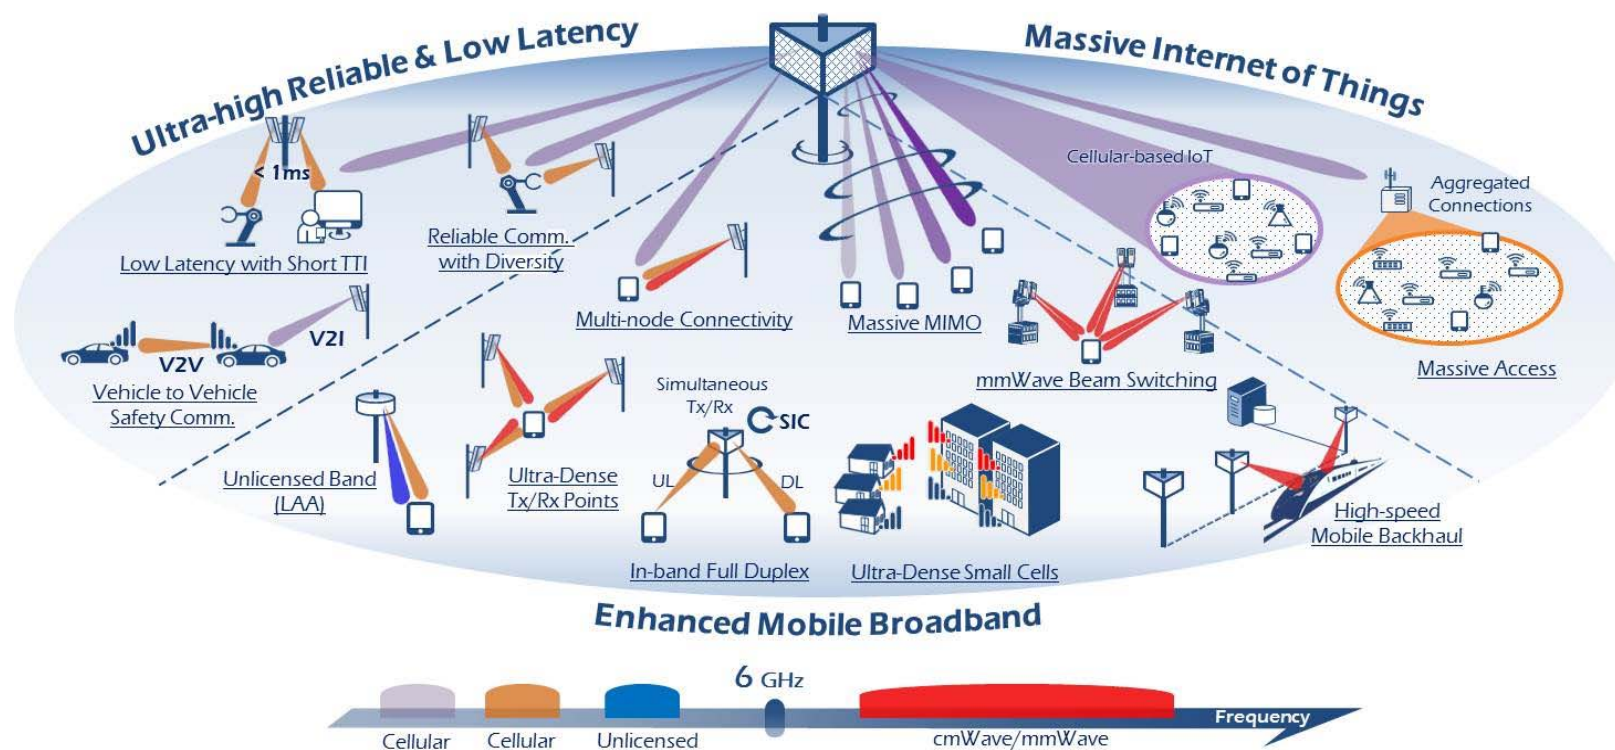

5G IoT

# Spectrum Utilization in 5G

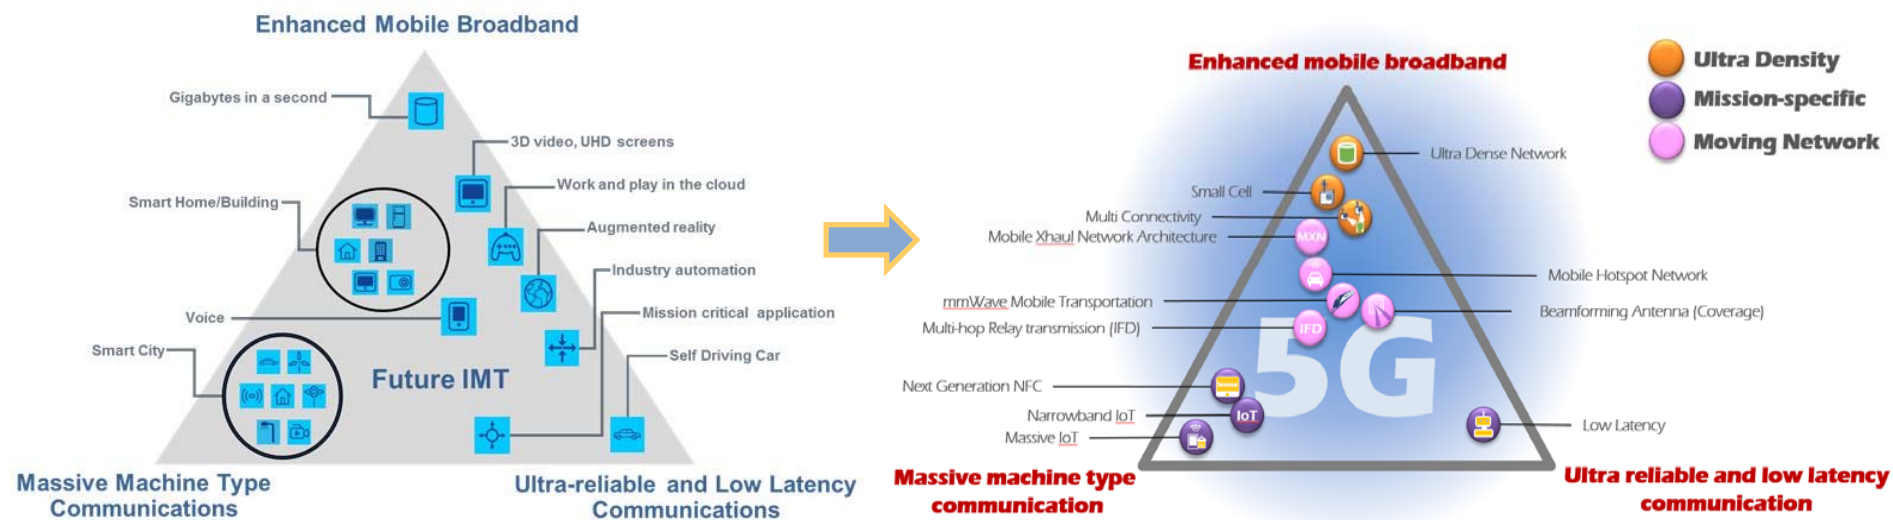

# 5G enabling technologies

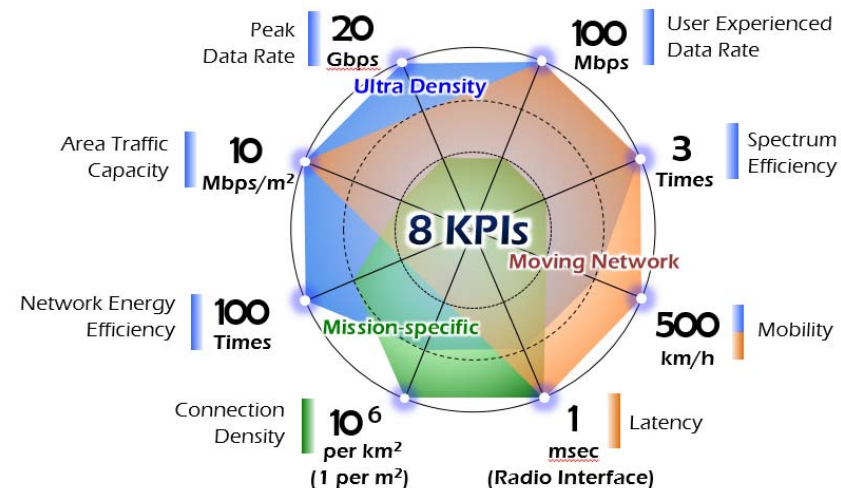

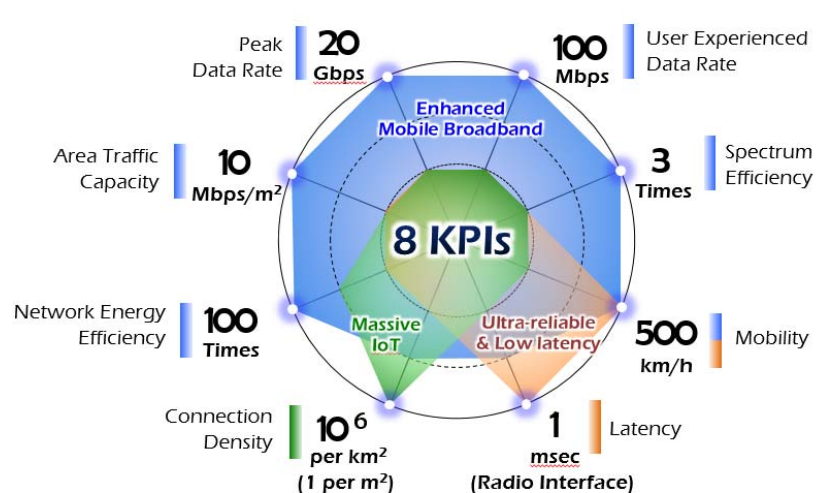

# Usage Scenarios

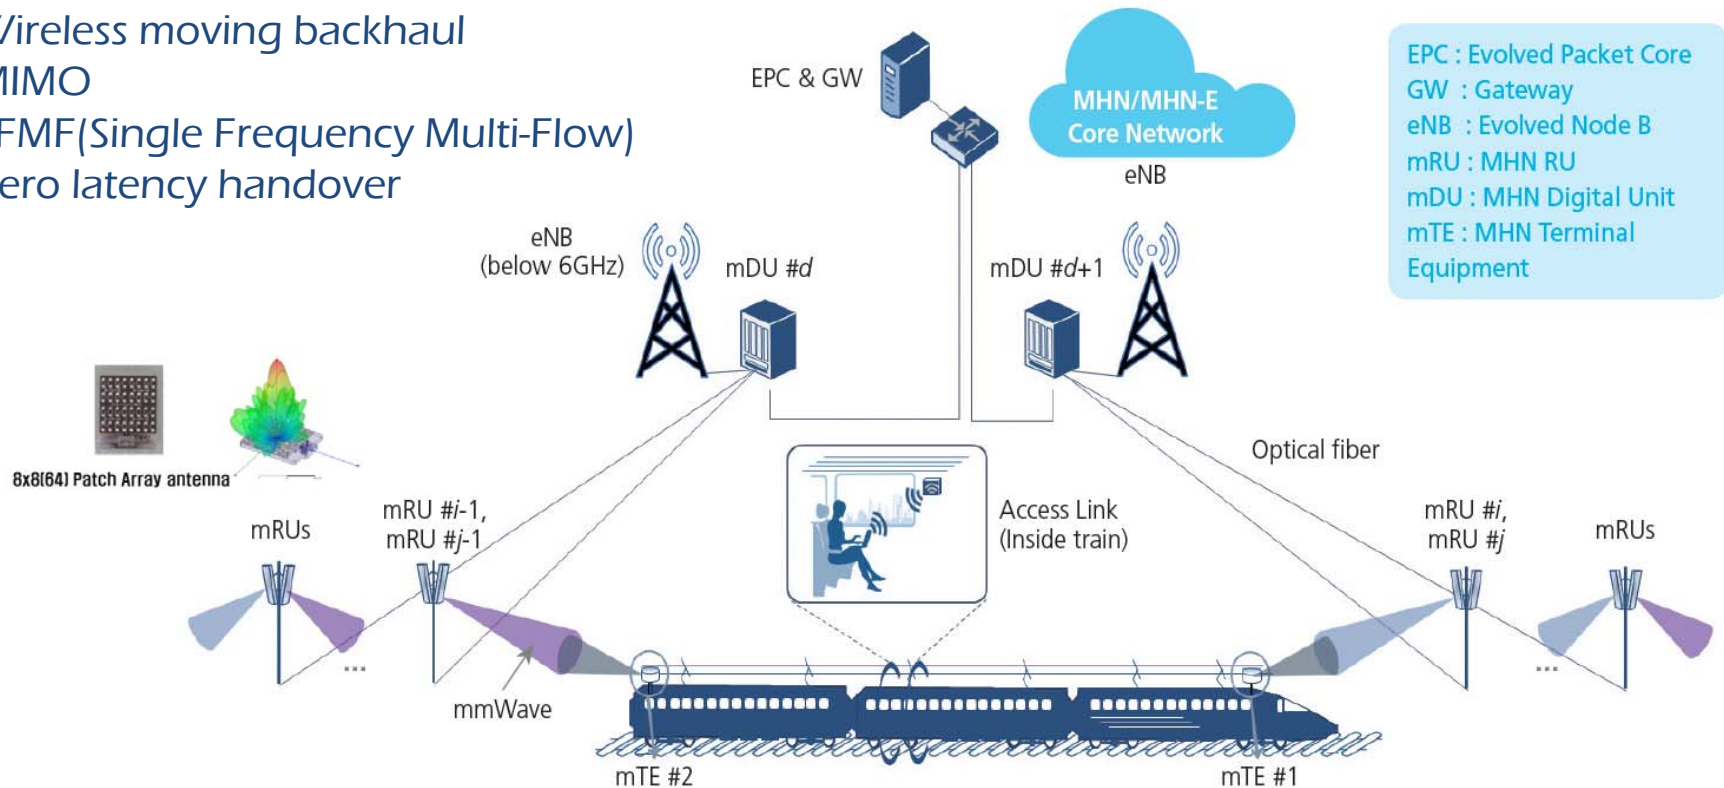

# 5G Key Capabilities

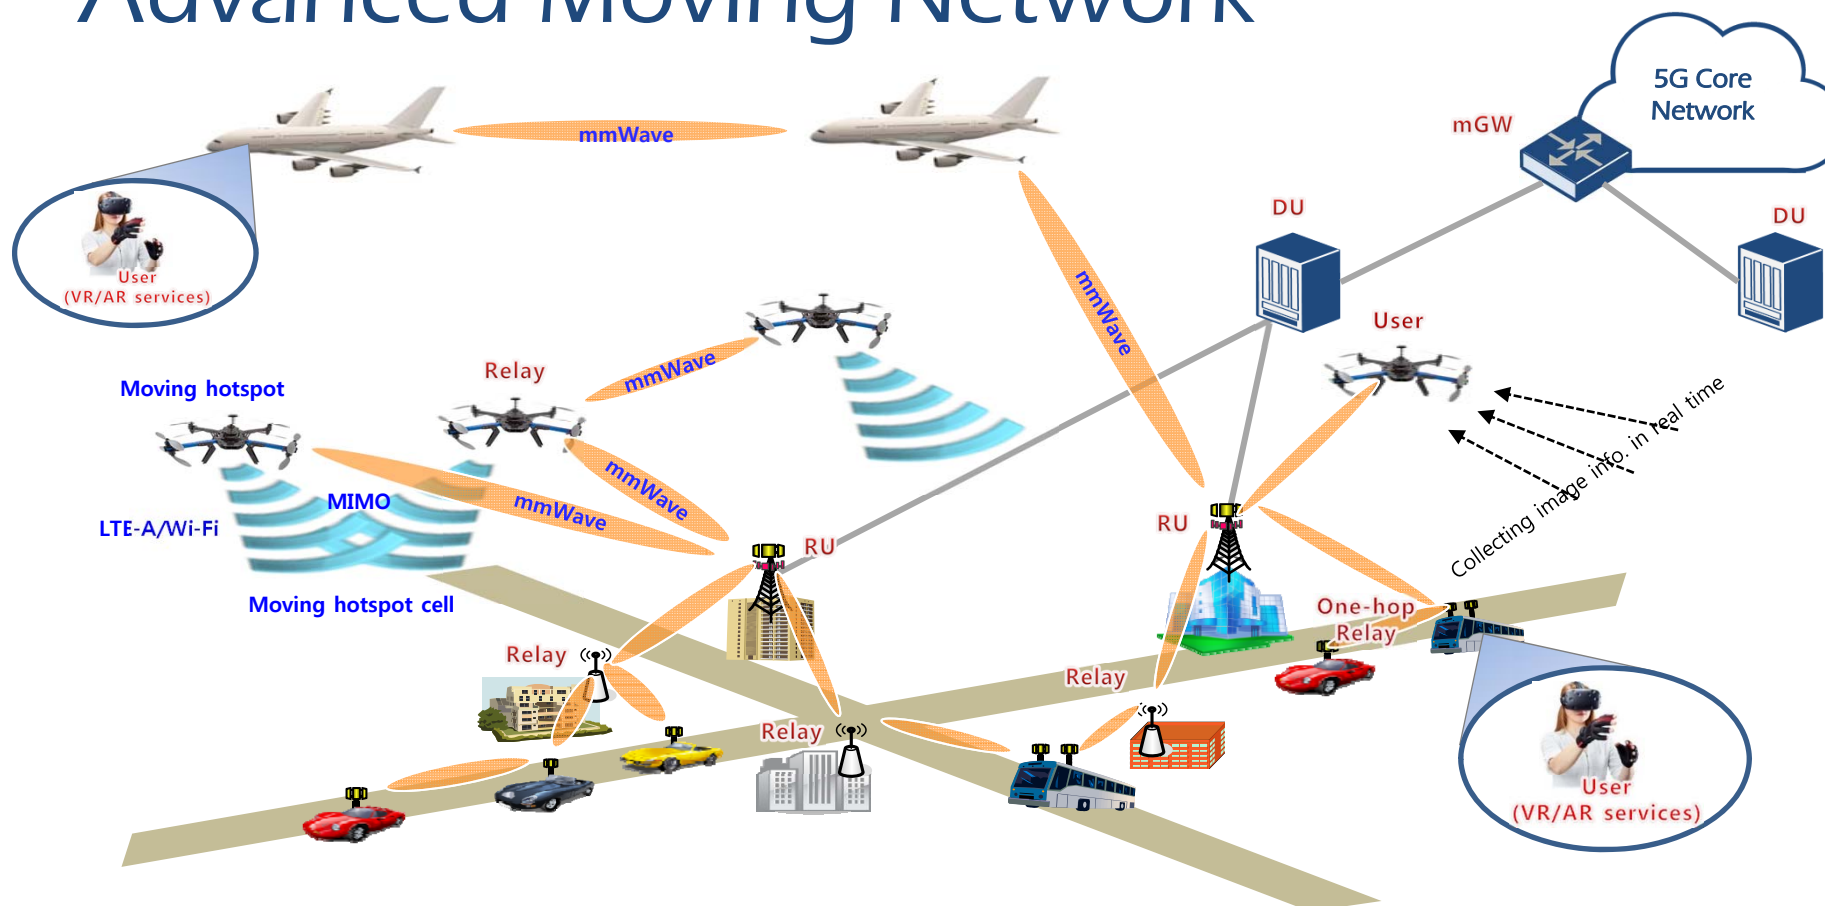

# Moving Network: High-speed moving Backhaul

- Wireless moving backhaul
- MIMO
- SFMF(Single Frequency Multi-Flow)
- Zero latency handover

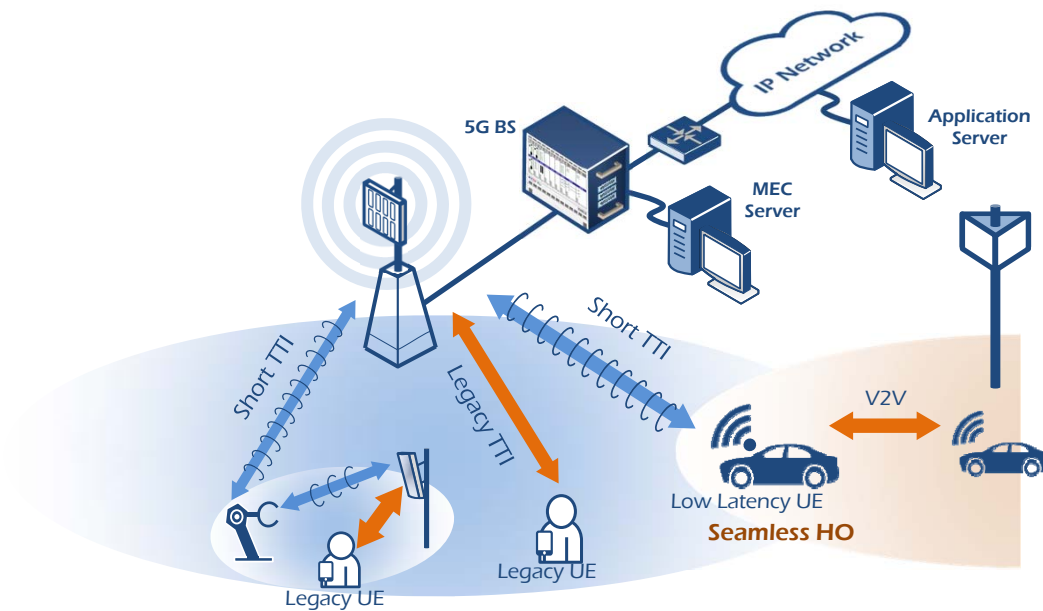

# Advanced Moving Network

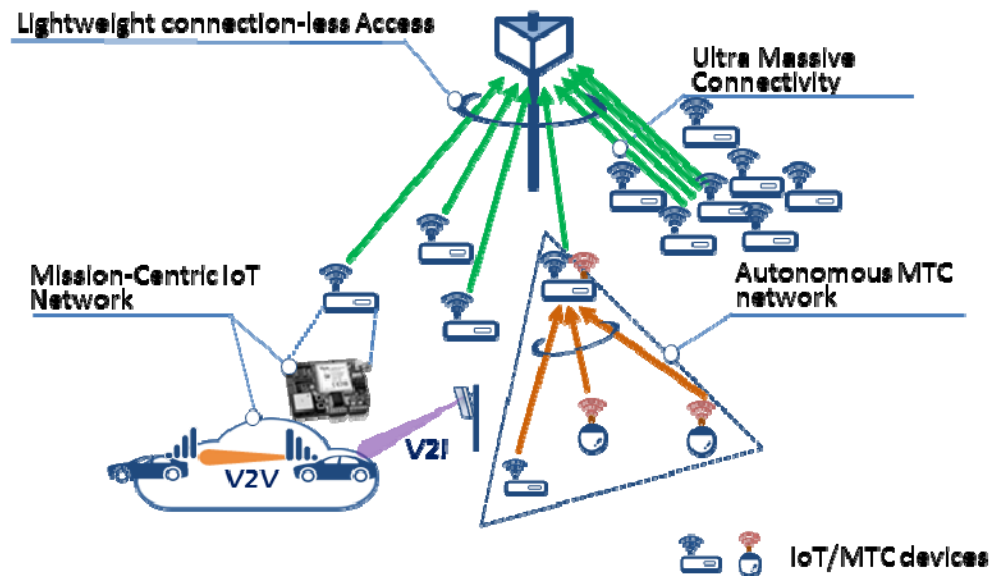

# Mission-specific: Low Latency

- Grant-free contention based transmission schemes
- Real-time control and big data processing based on edge cloud/fog computing
- Enhanced transmission schemes including multiple diversity, new HARQ, new coding & modulation, etc.
- Handover interruption time reduction

# Mission-specific: Any-X IoT

## Any-X(Place/Time/Thing) IoT

- Autonomous MTC networking based on Direct M2M Communication
- Aggregation and relaying of data from the local devices
- Maximizing # of connected devices/unit area with increased resource reuse
- Maximizing peak simultaneous device capability

# Summary

- 5G?
  - ❖ New RAT covering Vertical industries' requirements
  - ❖ Aggregation of the heterogeneous resources
- Three Categories of 5G Enabling Tech.
  - ❖ Ultra Density
  - ❖ Mission-specific
  - ❖ Moving Network
- Remaining Critical Issue
  - ❖ Collaboration with neighbors

---

Thank You !!!
